(54) Fertilizer distributor apparatus

(75) Hamann, P.F.

(74) CU

(57) Claim

1. Fertilizer dispersion and distributing apparatus including:

a container for containing fertilizer having an inlet and an outlet located in an upper portion thereof;

an inlet hose attached to the inlet, which is connectable to a water supply source;

an outlet hose attached to the outlet;

water spraying means connected to the outlet;

a pipe depending from the container inlet; and

a filter surrounding at least the outlet;

the construction and arrangement being such that in use as water enters the container from the inlet it is passed onto the fertilizer in the bottom of the container and allows sufficient time for the fertilizer to be dissolved in or dispersed in the water before passing out through the filter and thence through the outlet of the container to the water spraying means.
